

Floor Scrubber Cleaning Solutions

T300

Scrub Path: 17", 20", 24"

Clean virtually any hard surface, including porous stone, grout and finished concrete, with the Tennant T300 High Performance Walk Behind Floor Scrubber. This affordable, battery powered machine offers versatile cleaning with 17 in, 20 in or 24 in paths, an 11 gal tank and up to 109 lb of down pressure

T600

Scrub Path: 28", 36", 36"

The T600 Walk-Behind Floor Scrubber delivers durable, high-performance cleaning for tough environments, with flexible cleaning head options and productivity-boosting technologies to fit your needs. Replacing the 5700, it features a 32-gallon tank, 28"-36" cleaning paths, and up to 300 lbs of down pressure for powerful, efficient results.

T16

Scrub Path: 36", 45", 46"

Lower your cost to clean with this quiet, battery-powered ride-on floor scrubber, designed for easy operation with Touch-n-Go™ controls and available sustainable technologies like ec-H2O™ and ES® Extended Scrubbing. It features 36"-46" cleaning paths, a 50-75 gallon tank, and up to 250 lbs of down pressure for efficient, eco-friendly performance.

T17

Scrub Path:
40", 46", 49", 52"

The T17 is a high-performance battery-powered scrubber designed to deliver customizable, efficient cleaning in a single pass while improving indoor air quality and the overall operator experience. It features 40"-52" cleaning paths, a 75-115 gallon tank, and up to 550 lbs of down pressure for powerful, large-scale performance.

T20

Scrub Path:
40", 42", 54", 56"

The T20 Industrial Ride-On Floor Scrubber delivers powerful, heavy-duty cleaning for the toughest environments, with excellent scrubbing and water recovery for consistent results. Designed for easy operation and maintenance, it features 40"-56" cleaning paths and an 80-125 gallon tank to maximize productivity and facility appearance.

M20

Scrub & Sweep Path:
40", 54", 56"

The M20 Ride-On Sweeper-Scrubber boosts productivity with powerful sweeping and scrubbing in a single pass—wet or dry—while enhancing safety and facility appearance. Easy to operate and maintain, it features 40"-56" cleaning paths, a 56-74 gallon tank, and a 3.9 cubic ft hopper for efficient, all-in-one cleaning.

AMR Floor Scrubber Cleaning Solutions

X4

Scrub Path: 20"

Our most nimble autonomous scrubber, the X4 ROVR, is designed to support staff and improve productivity in smaller spaces. With a 20 in cleaning path, 10 gal solution tank, up to 42 lb of down pressure, compact size, improved obstacle detection, and enhanced mobility, it reduces assists and boosts ROI.

X6

Scrub Path: 26"

The X6 ROVR is a mid-sized autonomous scrubber designed to maximize cleaning coverage with minimal oversight. Featuring a 26 in cleaning path, 25 gal solution tank, and up to 120 lb of down pressure, it combines efficiency, maneuverability, and ease of use to deliver consistent cleaning across tight spaces and large areas while freeing your team for high-value tasks.

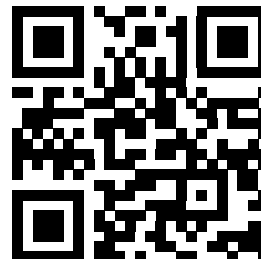

T16

Sweep Path: 36"

The T16AMR is an autonomous industrial floor scrubber designed to address labor challenges, improve efficiency, and maintain consistent cleaning results. Powered by BrainOS® technology, it safely operates alongside employees while reducing the need for pre-sweeping. Its ec-H2O NanoClean® system lowers water and detergent usage, and it offers flexible power options with lithium-ion or lead-acid batteries. With a 36-inch cleaning path, 50-gallon tank, and up to 200 lb of down pressure, it delivers powerful, efficient performance.
